

# Mastering Fibonacci Techniques in Less Than 7 Days: The Ultimate Guide

The Fibonacci sequence is a series of numbers where each number is the sum of the two preceding ones, starting with 0 and 1. It was first described

by the Italian mathematician Leonardo Fibonacci in his book Liber Abaci in 1202.

The Fibonacci sequence has been found to appear in many natural phenomena, such as the arrangement of leaves on a plant stem, the spiral patterns of seashells, and the proportions of the human body. It has also been used for centuries in art, architecture, and music.
