Their stories are told in the new book, *How Team of Women Coded the Future*, by author Author Name. The book tells the stories of six women who made significant contributions to the development of computing, including:

- Grace Hopper: A US Navy rear admiral who invented the first compiler for a computer programming language.
- Ada Lovelace: A British mathematician who is considered the world's first computer programmer.

- Betty Holberton: One of the six original programmers of the ENIAC, the first electronic general-purpose computer.
- Jean Jennings Bartik: Part of the team that developed the first stored-program computer, the BINAC.
- Frances Allen: A computer scientist who developed the first optimizing compiler for the FORTRAN programming language.
- Margaret Hamilton: A software engineer who led the team that developed the software for the Apollo 11 mission to the moon.

These women faced many challenges in their careers. They were often underestimated and overlooked by their male colleagues. But they persevered and made major contributions to the field of computing.

How Team of Women Coded the Future is an inspiring story of these pioneering women who helped to shape the world of technology. It is a must-read for anyone interested in the history of computing or in the role of women in STEM fields.
