

The Last Man on the Moon

A Journey of Triumph and Loss

On December 14, 1972, Eugene Cernan became the last man to walk on the Moon. His mission, Apollo 17, was the sixth and final lunar landing of the Apollo program. For three days, Cernan and his crewmates Harrison Schmitt and Ronald Evans explored the lunar surface, conducting experiments and collecting samples. They also left behind a plaque that reads, "Here men from the planet Earth first set foot upon the Moon July 1969, A.D. We came in peace for all mankind."

The Last Man on the Moon is Cernan's personal account of his historic mission. He writes about the challenges of spaceflight, the beauty of the Moon, and the profound impact the experience had on his life. Cernan's story is a fascinating and inspiring tale of human exploration and achievement.

Triumph and Loss

The Last Man on the Moon is a story of both triumph and loss. Cernan and his crewmates successfully completed their mission and returned to Earth safely. However, the Apollo program was soon canceled, and Cernan never had the opportunity to return to the Moon. He writes about the disappointment he felt at the end of the program, but he also expresses his pride in what he and his fellow astronauts accomplished.

Cernan also writes about the loss of his crewmate, Ronald Evans. Evans died in 1990 at the age of 56. Cernan was deeply saddened by Evans' death, and he writes about the impact it had on his life.

A Personal Journey

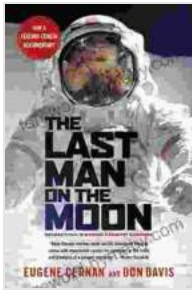

The Last Man on the Moon is more than just a recounting of Cernan's mission to the Moon. It is also a personal journey. Cernan writes about his childhood, his family, and his experiences as an astronaut. He shares his thoughts on life, death, and the meaning of it all.

Cernan's story is a fascinating and inspiring tale of human exploration and achievement.
